THE POWER OF DESIGN

Active rest has become more and more popular in Poland. BONITA railroad car is an ideal product for people who love biking, new challenges and original design. Elegant, inspired by the look of first cars, our railroad car can offer an interesting change to your excursions with family or friends. But it has more

advantages than just its look. It is the lightest handcar in Poland, propelled by legs and not, as in traditional models, by hand. This four- or six-person, cheerful and original form of joint travelling will show you new, friendly and sunnier face of railroads.

THE LIGHTEST RAILROAD CAR IN POLAND

PLEASURE AND FUN

SAFETY

TECHNICAL DETAILS:

- construction: steel frame, aluminium floor, polyester and glass fibre body
- drive: front – rack 52, back – freewheel 15
- chain tensioner
- 4 aesthetic bumpers
- 4 Thule bike racks

FUNCTIONALITIES, ADVANTAGES AND INNOVATIVENESS

- **functional** – light steel structure, solid bike racks, space for pedalling persons and for other travellers, bike water bottle racks, possibility of connecting other railroad cars
- **aesthetic** – original design inspired by old-fashioned cars

- **innovative** – surprisingly light (140 kg only), designed for passenger and operating person comfort, easily driven. This leg-propelled vehicle offers more space for movement, requires less effort; untypical materials, handles for short-distance carrying the railroad car
- **safe** – hip safety belts, stable Thule bike racks (4 bikes), constructed with full attention to passenger safety

MODERNITY
